Passionate web developer about modern web technologies, eager to contribute to dynamic projects. Dedicated to crafting user-friendly web applications, seeking opportunities to grow skills and make meaningful team contributions.

SKILLS

HTML, CSS, Bootstrap, jQuery, Responsive Web Design, Git, GitHub, MySQL, Database Design, ERD, PHP, OOP, Model View Controller (MVC), CodeIgniter, JavaScript ES5 & ES6, NodeJS, Express, ReactJS, EJS, Socket.io, Python, User Experience Design (UX), Figma, Agile (Scrum), Amazon RDS

INTERNSHIP

Quality Assurance Manual Tester (August 2023 - September 2023)
Ollopa Corporation – Quezon City, Metro Manila
Promoted to team leader to supervise and guide other interns in their testing tasks and work with the AI department to debug and test AI web-based projects.

TRAINING

Village88 Coding Training (January 8, 2024 - April 29, 2024)
Finished rigorous and intensive Full Stack Web Development Training consistently from web fundamentals to advanced level. Exam passer in all certifications and developed 2 projects.

PROJECTS

eCommerce – developed to sell and buy various products. It has an admin page to add, update, and delete products and orders, and a customer page to purchase products.
SheetSoundSynth – application that can turn a music sheet image into a playable melody. The user can play the music into different instruments and save it in their account.
Integrated Fire Monitoring and Analysis System – application to monitor fire incidents in Cavite using NASA's satellite instruments, identify the risk level using historical fire data, and visualize it on a map.
PESO System – application for job applicants in Imus. It features a user page for submitting applications and an admin page for managing applications, performing data analytics, and generating reports.
